

PRODUCTS IN USE

Miniature S-Beam Jr. (LSB200) paired with Instrumentation (IPM650, IHH500, USB Solutions, or CSG110 Amplifier).

APPLICATION SUMMARY

Many industries use test fixtures to measure their presses or impact stands. FUTEK's LSB200 Load Cell is suitable for applications needing precise, low-capacity impact test measurements.

All FUTEK application illustrations are strictly conceptual. Please contact us with questions.
